#### **THE STORY**

Triowrap was introduced in the 1980's and is one of the worlds most used bale wrap. We have a long history within the baling application and Triowrap is well tested by contractors, machine manufactures, independent research institutes and SLU (Swedish University of Agricultural Sciences). The Triowrap premium film assortment offers you highest reliability due to best running performance, solutions for wrappers as well as ideal characteristics for securing the valuable feed. A full range of products to cover all needs when baling crops - For best economical silage with a sustainable leadership!

#### **Try our** bale wrap guide on triowrap.com

#### **TRIOWRAP CROP BALING SOLUTIONS**

#### **BALE WRAP PACKAGING OPTIONS**

- Packaging alternatives for all different needs
- Contractorwrap or the unique patented sleeve packaging for reduced waste and efficient baling

#### **MANTLE FILM FOR BEST FILM ON FILM PERFORMANCE**

- Highest bale output in the market for mantle film
- Film on film with our PlusTech products for perfect seal of • the bales with high silage quality and optimal bale shape for easy bale handling and storage

### **Bale wrap guide on Triowrap.com**

#### HIGHEST EFFICIENCY

#### **PROVEN** SILAGE QUALITY

### **HOW TO BE SUSTAINABLE IN BALED SILAGE**

- Reduce your feed losses Triowrap products have been proven with very low losses, e.g. dry matter losses down to 1% •
- Be efficient in your silage making with our Triowrap plus products you can increase your efficiency by up to 73%! •
- Switch to our thickness optimised Triowrap plus products, based on the PlusTech technology for reduced material usage •
- Use products with recycled content Try our Triowrap loop! Triowrap plus and TrioBaleCompressor are also available as • loop options reducing the carbon footprint by up to 50%!
- Reduce your packaging waste by switching to packaging alternatives as Sleeve or Contractorwap •
- Collect and sort plastic waste after usage for recycling all Triowrap products are fully recyclable, including the • packaging!

#### FEED LOSSES HAVE THE HIGHEST IMPACT

Making high-quality silage and preserving the nutrient value of the plant material as good as possible is the foundation for sustainable baling. Nothing affects your carbon footprint as much as feed losses. Additionally low losses save cost and contribute to animal performance and welfare.

- With Triowrap and Triowrap plus compared to market standard, you can:
- Get a silage quality tested product
- Produce baled silage with DM-losses of 1%
- Decrease losses equal to 6-13 liters of milk per bale

#### IN THE END OF THE DAY IT'S THE VALUE OF THE SILAGE THAT COUNTS!

#### WHAT IS LCA AND WHY DO WE MEASURE IT?

Our Life Cycle Assesment (LCA), performed with SimaPro, is a method to assess the overall environmental impact of a product's life cycle. Our analyzes are done considering the climate impact until delivery of the product (cradle-to-gate). In our assortment you can chose products with up to 50% reduction of climate impact. For all our more sustainable solutions, regardless if based on PlusTech or loop technology, we have LCA figures available, which state the specific carbon footprint reduction.

### have recycled material in it at the same time. That's just fantastic!" **Carl Johan Bertilsson**

**Swedish Farmer** 

# "You can save plastic and

g är fram

### **RECYCLED BALE WRAP? OF COURSE!**

As feed losses have the greatest impact on sustainability in baled silage, a premium bale wrap to maintain the forage quality is mandatory. But: this premium bale wrap film can be made from recycled content!

Thanks to our own recycling plants and our advanced technology, we have succeeded to develop a portfolio of products with recycled content, also called loop. Our loop products offer the same mechanical and ensiling properties as our regular Triowrap films.

The PCR (post-consumer recycled material) used in the film comes from used bale wrap, which enables a true loop within baled silage! Our loop film has been tested regarding silage quality by the Swedish Agricultural University.

Already more than 5 million bales done successfully, what are you waiting for? Switching to bale wrap containing recycled content can't be easier than that!

#### WHAT MAKES OUR LOOP PRODUCTS SO SPECIAL

- Contain recycled content and are fully recyclable
- Close the loop from agri to agri
- Same mechanical properties as the virgin product
- Excellent stretchability and elasticity for airtightly wrapped bales with long lasting protection
- Can be used on all types of wrappers and crops

#### THE RECYCLING PROCESS

It feels good to take a step forward for the climate with recycled plastic, especially when it works as well as it does.

Andreas Neass Norwegian contractor

### HOW SUSTAINABILITY MAKES YOU MORE EFFICIENT AT THE SAME TIME: PLUSTECH™

PlusTech is our name for a number of technology innovations that combine a special blend of raw materials, unique manufacturing processes and over 50 years of knowledge and silage expertise in different processes to achieve products with improved efficiency for end-users.

## THE UNIQUE TECHNOLOGY FOR A PERFECT THINNER PREMIUM FILM

#### Your benefits with PlusTech

- Less climate impact
- Optimized wrapping and ensiling properties
- No compromising on fodder quality
- Best economical silage due to highest efficiency

#### Higher efficiency – Save time & money!

At the same time you can increase your efficiency significantly, thanks to more meters of film per reel! Check out below graphic to see just by how much.

- Excellent tear strength
- Minimal air permeability
- Smooth bale surface
- Minimized disposal costs

Based on: Round bale 1,20 m, 6 layers of film, 55 % overlap, 70 % pre stretch, when comparing to 1500 m/25µ film

## "I am wrapping 10.000 bales per year - I really need an efficient bale wrap, I can rely on. For years now, the Triowrap plus products have been the right choice for me." Per Johnsson, **Swedish Contractor**

#### **TRIED, TESTED, PROVEN**

- Tried and tested with high performance and high silage quality
- Reliable choice for all wrapping applications
- Premium multilayer blown film up to 7 layers
- Fully recyclable

Breast cancer					

You can be proud, because with this product you are donating to your local charity organization while raising awareness for cancer at the same time!

#### **DID YOU KNOW...**

Prostate cancer

Childhood cancer

...that the original idea was hatched by a farmer in New Zealand and became a reality through close cooperation between us and our New Zealand partners in 2014? The campaign, which started with the pink film to raise awareness and funds for breast cancer, primarily in rural areas, became such a success, that we decided to launch a blue bale wrap in 2015 to support prostate cancer awareness. In 2018 we completed the family: with a yellow bale wrap film we want to support childhood cancer organizations.

Guaranteed donation for each reel
