MANTLE FILM FOR BEST FILM ON FILM PERFORMANCE

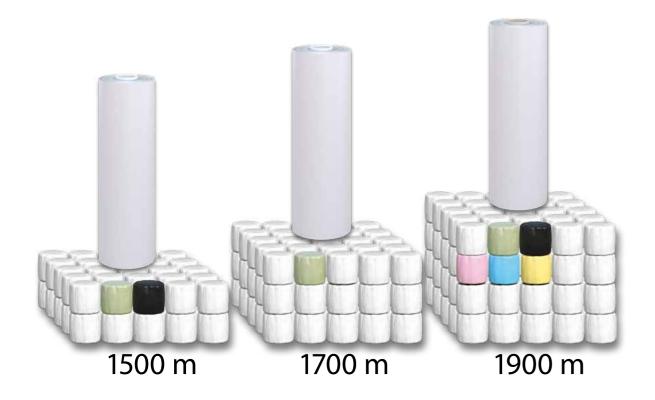

OUR BALE WRAP PRODUCTS

TRIED, TESTED, PROVEN

Tried and tested with high performance and high silage quality

Reliable choice for all wrapping applications

Premium multilayer blown film up to 7 layers

PRODUCT DATA

Dimensions	Reels/pallet	Colour	Core	UV- Protection	Application
500 mm x 0.025 mm x 1800 m	24	White, Light green, Black	Plastic (PP) core	12 months	For round and square bales
750 mm x 0.025 mm x 1500 m	15	White, Light green, Black	Plastic (PP) core	12 months	For round and square bales
750 mm x 0.025 mm x 1700 m	15*	White, Light green	Plastic (PP) core	12 months	For round and square bales

loop inside, containing 30 % PCR, RecyClass certified

^{*}Contractorwrap packaging, no box packaging for efficient handling. Also, with more meters per reel

MAKES YOU MORE EFFICIENT!

More meters per reel - Increased output per day

Highest efficiency for all

bale types in all machines!

Also available

as loop with **30% PCR**

Proven with low silage losses - DM losses down to 1 %!*

Up to 41% reduced carbon footprint**

PRODUCT DATA

Dimensions	Reels/pallet	Colour	Core	UV- Protection	Application
750 mm x 0.021 mm x 1900 m	15 ²⁾	White, Light green, Black ¹⁾	Premium water protected paper	12 months	For round and square bales

Charity edition: pink, blue, yellow

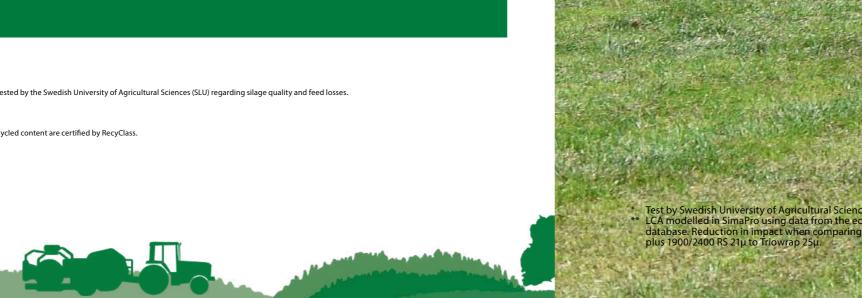

²⁾ Packaging: 1900 m - Box, sleeve or Contractorwrap packaging Solution. 2400 m - Only Contractorwrap packaging solution.

riowrap plus has been tested by the Swedish University of Agricultural Sciences (SLU) regarding silage quality and feed losses.

All our products with recycled content are certified by RecyClass.

Available as loop, containing 30 % PCR, RecyClass certified

SUPPORTS CANCER AWARENESS

Same function and high quality as other Triowrap plus 1900 m products

Light colours pink, blue and yellow raise awareness for cancer and also help to achieve a high-quality silage

Raises money for donation to cancer research*

*Guaranteed donation for each reel. Amount of money depends on agreement in each country/region where the product is sold.

PRODUCT DATA

Dimensions	Reels/pallet	Colour	Core	UV- Protection	Application
750 mm x 0.021 mm x 1900 m	15	Pink, Blue, Yellow*	Premium water protected paper	12 months	For round and square bales

loop inside, containing 30% PCR, RecyClass certified

Breast cancer

Prostate cancer

You can be proud, because with this product you are donating to your local charity organization while raising awareness for cancer at the same time!

Childhood cancer

All our products with recycled content are certified by RecyClass.

DID YOU KNOW...

...that the original idea was hatched by a farmer in New Zealand and became a reality through close cooperation between us and our New Zealand partners in 2014? The campaign, which started with the pink film to raise awareness and funds for breast cancer, primarily in rural areas, became such a success, that we decided to launch a blue bale wrap in 2015 to support prostate cancer awareness. In 2018 we completed the family: with a yellow bale wrap film we want to support childhood cancer organizations.

Takes your silage to the next level

PREMIUM MANTLE FILM FOR SECURING SILAGE VALUE

10-30 % higher output per reel compared to other brands - lower cost per bale!

Patented properties – Enables optimal efficiency and tear resistance on bale!

Increases the silage quality according to independent tests

PRODUCT DATA

Dimensions	Reels/ pallet	Colour	Stretch in machine*	Specific benefits
1280 mm x 0.020 mm x 1800 m	16	Tinted white	20-25 %	Heavy duty product for mobile and stationary balers, for all types of users with edge-to-edge coverage.
1400 mm x 0.016 mm x 2200 m	16	Tinted white	18-30 %	Superior product for mobile balers for professional use and possibility to cover edge. 20 % increased output compared to other brands.
20.				Other Braines.

TrioBaleCompressor has been tested by the Swedish University of Agricultural Sciences (SLU) which proved better shaped bales, better airtightness and less mould, when compared to bales with net binding.

All our products with recycled content are certified by RecyClass.

CONTRACTORWRAP® PACKAGING

Specially developed for contractors and users with high throughput

Quick loading of the machine

No handling of empty boxes

Less impact on the climate

Cardboard protection between reels to prevent friction

ONE PIECE PACKAGING CONCEPT - UNIQUE SLEEVE

Edge protection for safe reel handling

100 % recyclable plastic – can be recycled with bale wrap

Unwinding direction on packaging for convenient loading

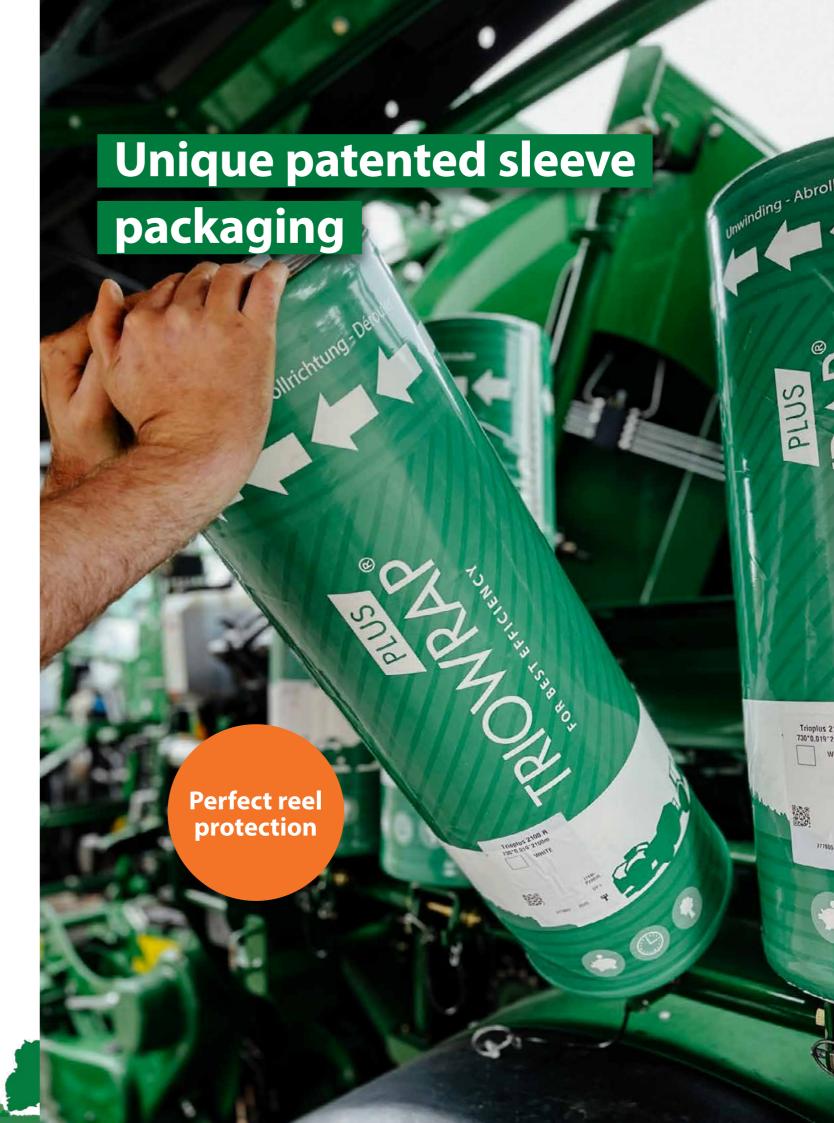

One piece packaging for efficient reel changes

Stretch levels of product on the label (TrioBaleCompressor)

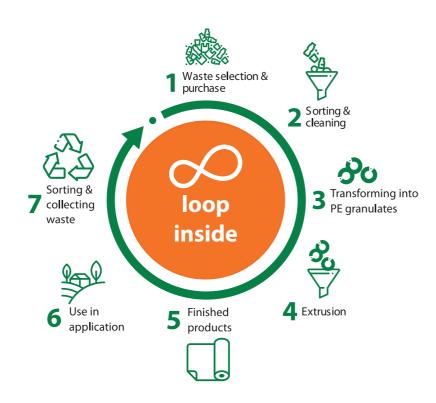

THE LOOP PROCESS

CLEANED AND SHREDDED

USED FILM

LOOP

WHAT MAKES OUR LOOP **PRODUCTS SO SPECIAL**

- Contain recycled content and are fully recyclable
- Close the loop from agri to agri
- Same mechanical properties as the virgin product
- Excellent stretchability and elasticity for airtightly wrapped bales with long lasting protection
- Can be used on all types of wrappers and crops
- All our products with recycled content are certified by RecyClass

BALE WRAP FILM

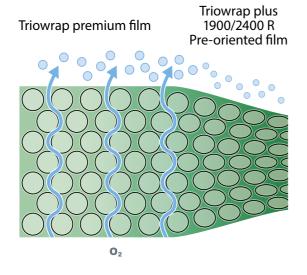

PLUSTECH™: MAKES YOU MORE EFICIENT

PlusTech is our name for a number of technology innovations that combine a special blend of raw materials, unique manufacturing processes and over 50 years of knowledge and silage expertise in different processes to achieve products with improved efficiency for end-users.

UNIQUE TECHNOLOGY FOR A THINNER PREMIUM FILM

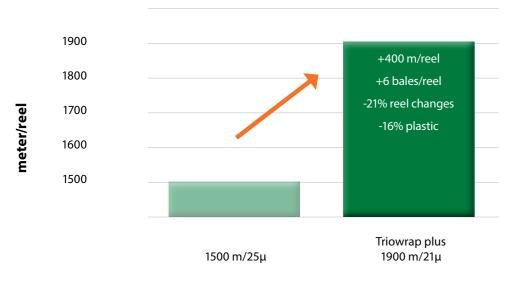

Your benefits with PlusTech

- Less climate impact
- Optimized wrapping and ensiling properties
- No compromising on fodder quality
- Best economical silage due to highest efficiency

- Excellent tear strength
- Minimal air permeability
- Smooth bale surface
- Minimized disposal costs

Higher efficiency – Save time & money!

Based on: Round bale 1,20 m, 6 layers of film, 55 % overlap, 70 % pre stretch, when comparing to 1500 m/25µ film.

THE VALUE OF SILAGE

Making high-quality silage and preserving the nutrient value of the plant material as good as possible is the foundation for sustainable baling. Nothing affects your carbon footprint as much as feed losses.

Additionally low losses save cost and contribute to animal performance and welfare.

With Triowrap and Triowrap plus compared to market standard, you can:

- Get a silage quality tested product
- Produce baled silage with DM-losses of 1%
- Decrease losses equal to 6-13 litres of milk per bale

In the end of the day, it's the value of the silage that counts!

HOW TO TAKE YOUR SILAGE TO THE NEXT LEVEL

Reduce your feed losses – Triowrap products have been proven with very low losses, e.g. dry matter losses down to 1%

Be efficient in your silage making – with our Triowrap plus products you can increase your efficiency by up to 27%!

Switch to our thickness optimised Triowrap plus products, based on the PlusTech technology for reduced material usage.

Use products with recycled content – Try our products with loop inside, reducing the carbon footprint by up to 50%!

Reduce your packaging waste by switching to packaging alternatives as Sleeve or Contractorwrap.

Collect and sort plastic waste after usage for recycling – all Triowrap products are fully recyclable, including the packaging!

Efficient & high-quality silage making

We know the hazards and challenges of the harvest season and we can support you with our many years of experience.

If you need help, our silage experts and technical support team is there to support you to improve your yield, efficiency and quality in your silage making - all over the world.
